

LEAD Meeting Minutes

Date: January 15, 2013

Time: 10AM

Faculty Members: Drs. Pate; Green; Smith; and Tsemunhu

Dr. Pate called the meeting to order.

Issues: LEAD catalogue revisions. Members agreed to remove GRE and MIT admission test scores requirement for admission into the Doctorial program. This decision was based on the fact that there is no proven relationship between doctorial success and the GRE and MIT scores. The program feels that we do not need to use the GRE/MIT scores to admit students because our program is performance based and most of our students are non-traditional. They have already passed a test requirement for the Masters program prior to enrolling into our program. Also the program cannot deny any student admission because Superintendents/principals send students that we cannot turn down.

Recommendation:

Eliminate the test requirement for student admission into the program because the program is performance based and the school districts' superintendents recommend students.

Meeting adjourned at 10:55am
